

LiquidSonics

CINEMATIC ROOMS
PROFESSIONAL

Upgrade Guide

Applies to version 1.000 (and above)

1. License Activation

iLok License Manager

Install the iLok License Manager version 5 or above available from the <http://www.ilok.com> website. If the version of license manager is too old it may fail to find a valid activation even if you correctly activate the licenses.

You may activate to:

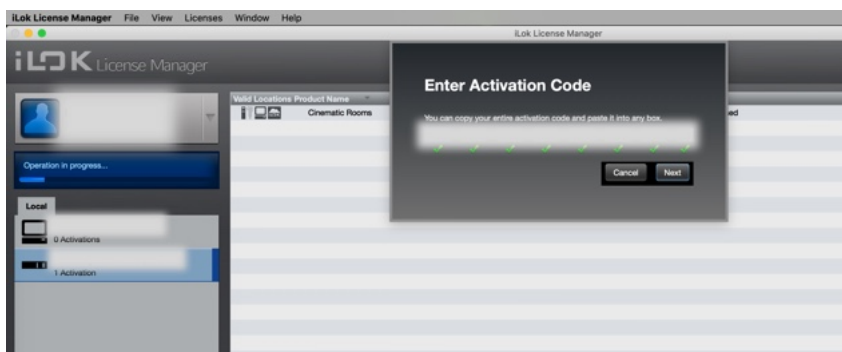

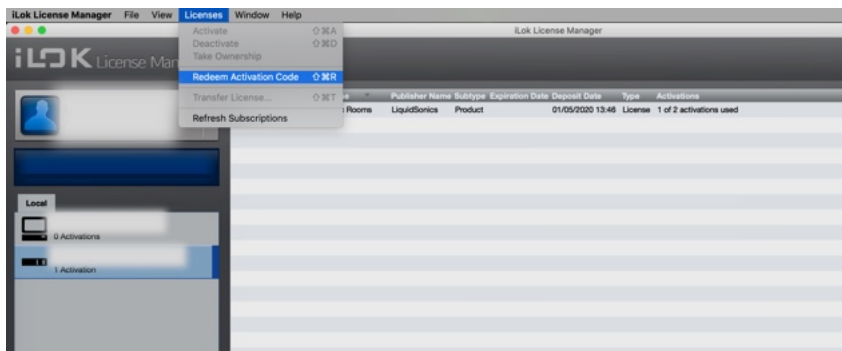

- An iLok 2 or 3 USB dongle
- A local computer hard drive location
- iLok Cloud

Please note that a Cinematic Rooms Professional license will unlock Cinematic Rooms standard edition so any DAW saves you may have in the standard edition can continue to be used with your professional license. Just ensure that your professional license is activated and that the standard edition is installed.

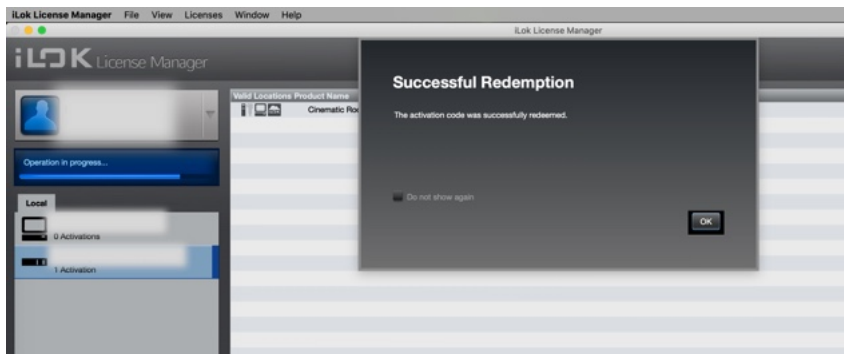

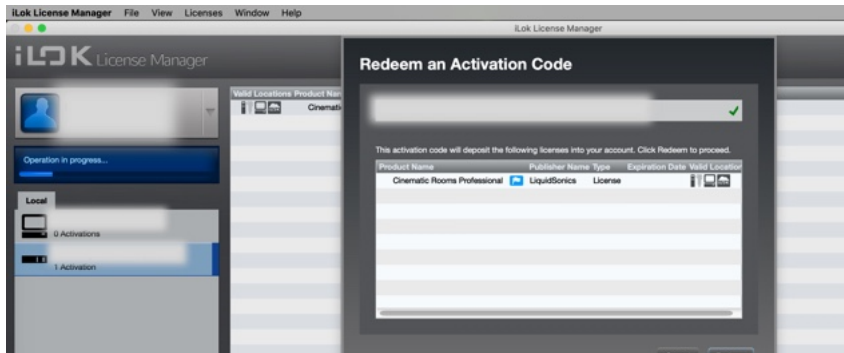

2. License Upgrade Process

Step 1: Redeem your license in License Manager

Enter your activation code in License Manager.

Note the flag next to the license – this indicates you must surrender a license during this process.

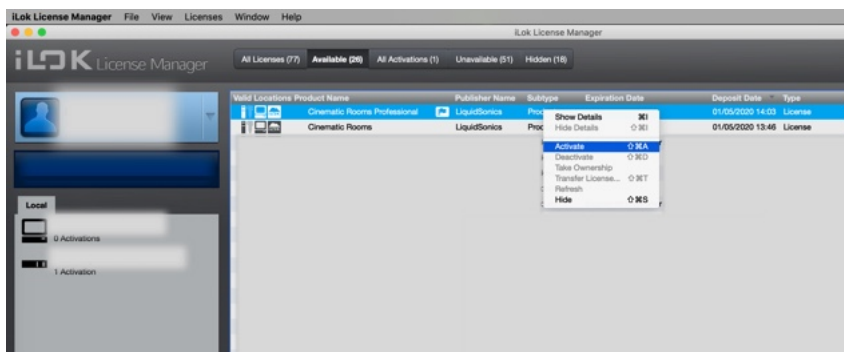

A professional edition license is now in your account, but it must be activated.

Step 2: Surrender and activate

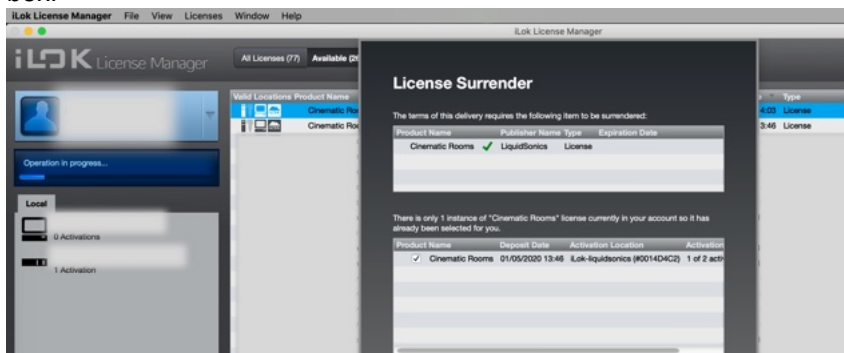

Note the flag is still present next to the newly redeemed 'Cinematic Rooms Professional'. This account also contains a license for 'Cinematic Rooms' standard edition which will be needed to continue.

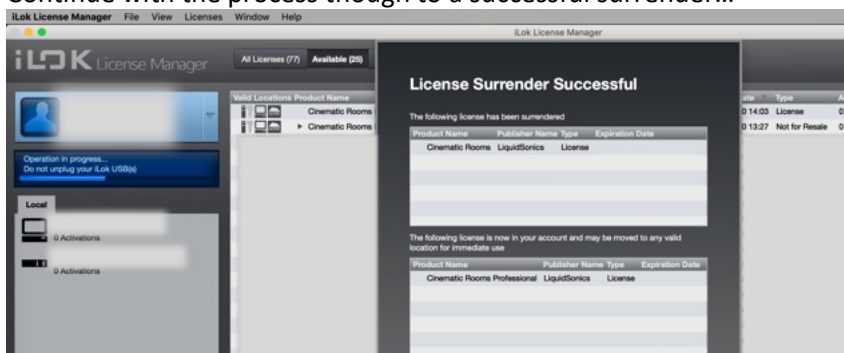

Right click the professional license, and click *Activate*.

You will see a screen informing you that you need to surrender the standard edition to proceed to activate the professional edition. If you have a license available it will be pre-selected in the second box.

Continue with the process though to a successful surrender...

...and activation to your desired location, or click 'activate later' and open a cloud session to use iLok Cloud.
